

Mathematical Mondays!

Albert Einstein

Something for you to watch first...

<https://youtu.be/GjoYbsvUoO4>

Some tricky ideas but this will tell you more about who Albert Einstein was and why he was an important mathematician!

Please do not subscribe to a you tube channel unless you ask an adult for permission!

The Bottle Drop Experiment!

If you can do this outside (just incase of any spillages).

You will need:
2 plastic bottles of the same size,
Some water

How to do the experiment:

Fill one bottle halfway with water,
Leave the other empty,
Find a clear space outside and a step (or a chair – if an adult is with you) to stand on,
At the same time drop both bottles to the ground,

What happens?

Why do you think this was the result?
