

L.I. To analyse and present data in a pictogram.

Steps to Success

- To understand what data is
- To understand how data is presented in a pictogram
- To understand how the scale can vary on pictograms
 - To be able to draw your own pictogram.

Key Question!

* What is a pictogram?

A pictogram is a way of representing data (information) in a chart by drawing pictures.

Example

Tally marks from yesterday's example

FRUIT	TALLY	TOTAL
Apple	 	7
Banana	 	5
Grapes	 	8
Orange		3

Favourite Fruit

<u>8</u>				
<u>7</u>				
<u>6</u>				
<u>5</u>				
<u>4</u>				
<u>3</u>				
<u>2</u>				
<u>1</u>				
	<u>Apple</u>	<u>Banana</u>	<u>Grapes</u>	<u>Orange</u>

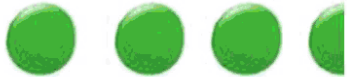

In this example each picture of fruit represents one person.

So 3 people like oranges the most!

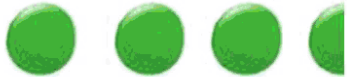

How many pupils prefer grapes?

How many pupils prefer apples?

How is this pictogram different?

Colour	Number of Smarties	Frequency
Green		7
Orange		8
Blue		5
Pink		6
Yellow		11
Red		8
Purple		7
Brown		3
	Key  = 2 smarties	

How is this pictogram different?

Colour	Number of Smarties	Frequency
Green		7
Orange		8
Blue		5
Pink		6
Yellow		11
Red		8
Purple		7
Brown		3
	Key  = 2 smarties	

Did you spot it?
Each picture here
Represents 2!

In fact...

The pictures in a pictogram can represent any amount as long as you write 'a key' explaining the value of each picture!

But, you must think carefully about the numbers you are going to represent- you don't want to be drawing quarter of a picture etc! That would be too tricky!

Your Turn!

- * Draw a pictogram to represent the data you collated yesterday regarding people's favourite holiday destination!
- * You choose what picture your going to use but remember to keep it simple- you'll be drawing it lots of times!
- * Remember to put a key to show the value of each picture.

Reflect on your learning!

* Can/ do you now....

- ... understand what data is?

... understand how data is presented in a pictogram?

... understand how the scale can vary on pictograms?

- ... draw your own pictogram?

I'd love to see a picture of your finished pictogram on
Twitter! 😊
