

Outdoor Spider Web Activity

What you will need:

- Sticks (Bigger sticks makes a bigger web)
- Wool/ String
- Scissors
- A helping hand from your mummy/daddy or brothers/sisters.

How to make a spider web

1. In your garden or on a walk collect some sticks.
2. Overlap the sticks to make the spokes on the spider's web.

3. Place the wool/string under the sticks and wrap it around the middle of the sticks to keep it in place.

4. Begin twisting the wool/string around each of the sticks (it doesn't matter which way). Keep the wool/string pulled tight before moving onto the next stick. Be sure to keep the wool/string closer together at the beginning of the spider's web and move wider as you go towards the edges of the stick.

Enjoy making your Spider's web with your families.
