

Fraction problems: halves, quarters and thirds

Write a number sentence to solve each problem. You can draw a picture to help you.

1. Ash had **12** football cards, and gave $\frac{1}{4}$ of them to Eddy.

How many cards did he give away?

$$\frac{1}{4} \text{ of } \underline{12} = \underline{\quad}$$

2. Eddy has **8** T-shirts. If $\frac{1}{4}$ of them are blue, $\frac{1}{4}$ are white and the rest are red.

How many red T-shirts does he have?

$$\frac{1}{2} \text{ of } \underline{\quad} = \underline{\quad}$$

3. Sal had a ribbon which was **40**cm long, but she only used $\frac{3}{4}$ of it.

How long was the piece of ribbon she used?

$$\frac{3}{4} \text{ of } \underline{\quad} = \underline{\quad}$$

4. Eddy, Polly and Ash shared a box of popcorn which cost **£6**. They split the cost equally.

How much did they each pay?

$$\frac{1}{2} \text{ of } \underline{\quad} = \underline{\quad}$$

5. Scully ate **32** dog biscuits, and Scrap ate $\frac{1}{2}$ as many.

How many dog biscuits did Scrap eat?

$$\frac{1}{2} \text{ of } \underline{\quad} = \underline{\quad}$$
