

# Fraction problems: halves and quarters

Write a number sentence to solve each problem. You can draw a picture to help you.

1. There were **12** flowers in Sal's garden. She picked  $\frac{1}{2}$  of them.  
How many flowers did she pick?

$$\frac{1}{2} \text{ of } \underline{\quad} = \underline{\quad}$$

2. Ash collected **8** eggs from the hen house.  $\frac{1}{4}$  of them were brown and the rest were white.  
How many brown eggs were there?

$$\frac{1}{4} \text{ of } \underline{\quad} = \underline{\quad}$$

3. Sal made **10** sandwiches. She put cheese in  $\frac{1}{2}$  of them and jam in the rest.  
How many jam sandwiches did she make?

$$\frac{1}{2} \text{ of } \underline{\quad} = \underline{\quad}$$

4. Polly, Kim, Eddy and Sal shared a bag of sweets. They each ate  $\frac{1}{4}$  of the sweets.  
If there were **20** sweets in the bag, how many did they each eat?

$$\frac{1}{4} \text{ of } \underline{\quad} = \underline{\quad}$$

5. Eddy ran for **20** minutes, but Ash only ran for  $\frac{1}{2}$  as long.  
How long did Ash run for?

$$\frac{1}{2} \text{ of } \underline{\quad} = \underline{\quad}$$

6. Polly counted **12** cars drive past her house.  
If  $\frac{1}{4}$  of them were blue, how many blue cars did she see?

$$\frac{1}{4} \text{ of } \underline{\quad} = \underline{\quad}$$
