

Class P1 Numeracy and Mathematics

Number Task 1

Aim: To increase speed and accuracy in addition and subtraction

Play an addition or subtraction game. Follow the link or Google 'Topmarks Hit the button'

<https://www.topmarks.co.uk/maths-games/hit-the-button>

Alternatively create your own bowling or throwing game to practise addition. Use saucepans and balled up socks for example and give each pan a different value so that you can add up your score.

Extra Challenge: create a shop and price items with amounts within 10p. Practise adding up the prices of 2 or 3 items.

Pattern Task 2

Aim: To copy and continue a pattern

Can you use cutlery to copy and continue these patterns? It can help to name the objects as you create the pattern from left to right. E.g. spoon, knife, fork, spoon, knife, fork, spoon...

Extra Challenge: Can you do the same with this pattern with 4 different items?
