

P2 Numeracy

(Friday if following blog)

This week's focus is:

Greater than, less than, rounding and estimation

LI. We are learning to use rounding and estimation.

Task 1

Play cover up game

You will need a 1–100 square, (in pack) or make your own.

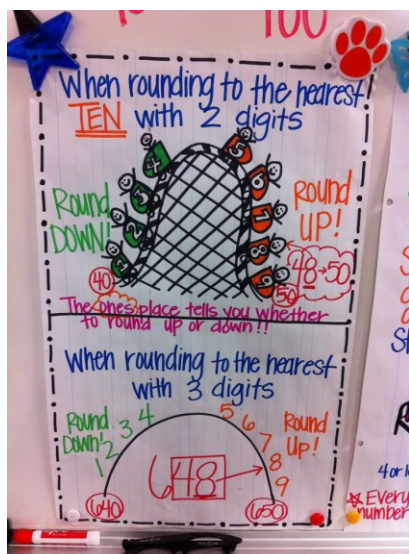

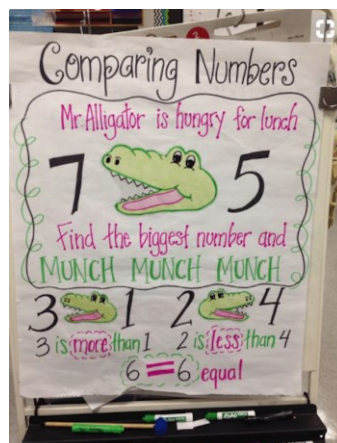

Items to use as counters to cover up your numbers.

Adult or sibling call out a multiple of 10, or shuffle number cards with 10, 20 etc on and child can take turn to pick one up.

use the counters to cover all the numbers which round to that multiple. For example, if you call/ picked up 40 they would cover 35, 36, 37, 38, 39, 41, 42, 43 and 44

Task 2

Make a poster to explain how to use rounding **or** the greater than less than symbols.

Task 3

Play game online
