1) Estimate answers to the following calculations using your knowledge of the nearest 100 or 10 multiple:										
	a) 30	2 - 151		-						
	b) 49	8 + 242		-						
	c) 72	9 + 32					•			
2)	2 acrob distanc as seen	oats land at ces across th here in met	different .e big top :res:							
	Estima landed	te how far o in metres.	apart they	A						
			0	Ì	I	I 5	0	I	I	100
1)	In the c a) Wi	ircus big top hich is the b	, 322 people wat est estimate for	tched the ev the total c	vening trapez amount of pe	e show and ple in the	l 268 watched tl 2 audiences tha	he daytime t day?	clown show	<i>.</i>
	59	0	550	620	79	0	500			1,
	b) Ex	plain your v	vorking:							K
2)	Which 363 +	of the follow 161	ving calculation 151 + 378	ıs could ha	we an estimo 632 – 99	ated answe	er of 530? 578 – 49	S.		
1) The big top has a possible 458 tickets available each night.										
381 tickets have been sold so far for tonight.										
Interingmaster wants to know roughly how many tickets are left to sell. He works Interingmaster wants to know roughly how many tickets are left to sell. He works Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left. Interingmaster wants to know roughly how many tickets are left.										
e	23		Do you agre	ee with his	s estimation?	?				
			Explain wh	y:						
			2) The jugglers get around t	s need roug the right a	Jhly 170 bal mount? Find	ls for their I all possib	act. Which sets ilities:	s of balls co	ould they co	ombine to
			43	64	127	110	91		77	129
