Problem Solving

L.I To try a simpler case

S.C. I can try a simpler case

  I find a number pattern

  I can continue a number pattern

Open your problem solving for the day and read the instructions carefully. You may want to read them a couple of times or write it simpler in note form (tip!).

The problem is asking you to find out how many ways he can come down 12 stairs. Using the try a simpler case method, try it out with a staircase with 3 steps, then 4 steps, then 5steps… can you spot a pattern? Could this pattern be continued to see what the answer is for 12 stairs?

I can't wait for you to share your answers!
