

Class P1 Numeracy and Mathematics

Numeracy Task 1

Number Task 2

Aim: To use the 'greater than' sign

Make some number sentences using the 'greater than' sign. (see yesterday's number task). Find things to use to make a greater than sign from around your house. Put a big number at the start at the open end and put a smaller number at the pointy end of the sign. Remember to think about the hungry crocodile who always likes to eat the biggest number. Look at the photographs on the next page to help.

Extra challenge: Try using larger numbers in your sentences like in the last photograph.

Aim: To apply number knowledge to play a game

Whilst on a walk play a game of 'Guess the House Number'. First spot a number on a house. Can you make a sensible guess as to what the numbers on the houses on either side will be? You will need to use your knowledge of numbers up to one hundred for this. You may also need to think about odd and even numbers and counting forwards or backwards in twos. Delivery drivers and postal workers will use these number skills all the time.

Extra challenge: Can you work out the number of a house 2 doors down?
