

P2 Numeracy

(Tuesday)

This week's focus is:

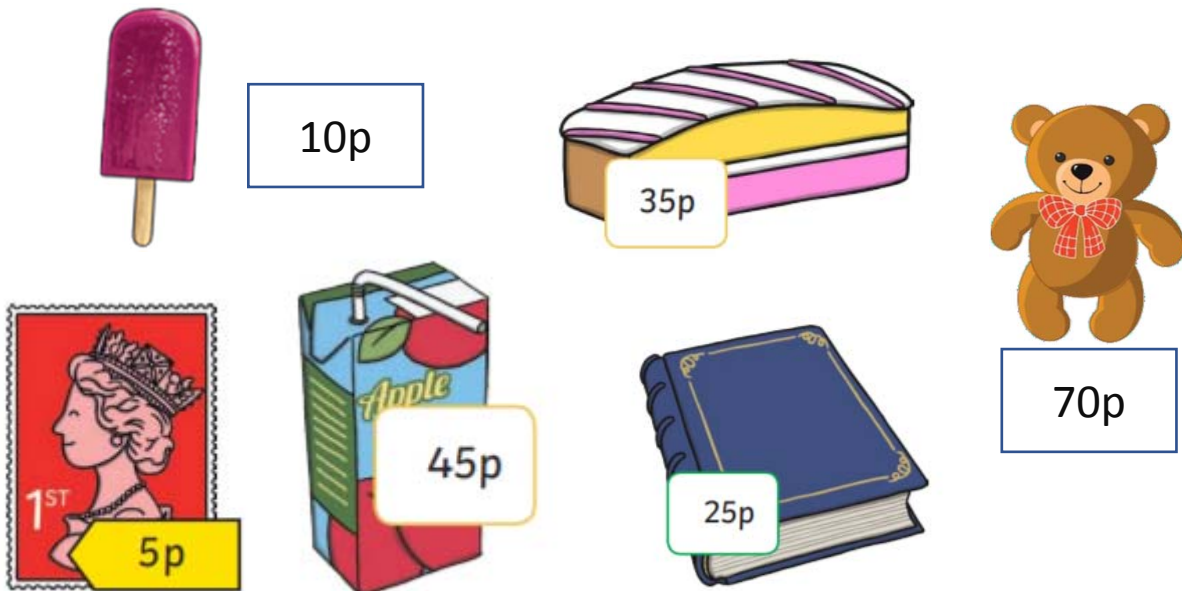

Subtraction and Money

LI. We are learning to use different strategies to subtract. (revision)

Use Subtraction when calculating change.

Task 1 -

You have £1 to spend. Write the calculation to work out change if you bought the following items (one purchase at a time only). Remember to convert your £1 to pence. USE YOUR PRACTISE OF BONDS TO 100 (AS PREVIOUS DAY) STRATEGY.

Task 2

If you spend over £1 then you get the cheapest item half price.

So what is the **most items** you could buy?

What item would you get for half price?

How much would that then be?

Task 3

Play shops! Items priced under £1.

Can you think of any special offers?

(When I was wee I used the ironing board (no iron) as my conveyor belt and the bit the iron sits on was the 'scales' for weighing the fruit, veg and pick and mix.)

I'd love to see pics of you shops!
