

Here piggy piggy?

When asked about the number of pigs in her field the farmer replied,

- There are less than 100, but more than 30 pigs in the field.
- When I divide the number of pigs by twos there was one left over.
- When I divided the number of pigs by threes there was one left over.
- When I divided the number of pigs by four there was one left over.
- When I counted in fives there were none left over.

How many pigs are in the farmers field?

31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Use a number square like the one above to help you eliminate the number you don't need.
